Definitions

Our investment funds offer a variety of different share classes, aimed at different types of investor:

- "Retail Shares" are generally owned by private individuals.
- "Second Retail Shares" have a lower initial charge than Retail Shares, but a higher Annual Management Charge. These shares are generally owned by private individuals who use the service of an Independent Financial Adviser (IFA). Please ask your IFA for further details.
- "Institutional Shares" are generally owned by corporations and professional investors. Institutional shares carry a higher minimum initial investment than Retail or Second Retail Shares, and lower fees.
- "Group Shares" are available only to LV= group internal investments.

LV= Investment Funds are stockmarket investments and neither their capital value, nor the income generated from them is guaranteed. Investors are not certain to make a profit and may get back less than their original investment. Past performance is not a guide to future investment performance.

Please refer to each Fund's Simplified Prospectus or ISA Key Features Document for further information.

ISIN

The ISIN (International Securities Identification Number) is unique to each share class of each fund. It can be used when placing dealing instructions and in all other correspondence to clearly identify a fund and share class.

Acc/Inc

Denotes the type of share class available, indicating whether they are Accumulation shares (Acc) or Income shares (Inc)

Ex-Div

Where payable, fund distributions are made to all shareholders who appear on the fund register as at a specific date (the Ex-Dividend date). The fund is shown as Ex-Dividend - and marked by an 'X' in the column - between that date and the date on which the distribution is made. Purchases made during this period do not qualify for the forthcoming distribution.

Yields

Where a fund is less than 12 months old, it is not possible to show an indendently calculated yield. These funds are denoted by a diamond (*) in the appropriate yield column(s). An estimated yield for these funds is available upon request by contacting LV=.

Published yields are as follows:

[a] The Equity Historic Yield reflects distributions declared over the previous twelve months as a percentage of the mid-market unit price. It does not include initial charge and investors may be subject to tax on their distributions. Calculated quarterly.

[b] The Bond Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid market unit price of the fund It is based on a snapshot of the portfolio on the day of calculation. It does not include any preliminary charge and investors may be subject to tax on distributions. Calculated monthly.

[c] The Bond Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market unit price of the fund. It is based on a snapshot of the portfolio on the day of calculation. It does not include any initial charge and investors may be subject to tax on distributions. Calculated monthly.
